

Welcome to Sir Winston Churchill Provincial Park, consisting of eight islands in Lac La Biche. Alberta's island park is fortunate to be surrounded by sandy beaches, with a 300 year old forest in the centre of the largest island. Not only is this a great location for family getaways, it is renowned for its outstanding bird watching.

All park trails are designed for hiking; however, some are appropriate for mountain biking in fair weather.

**Note:** Off-highway vehicles and snowmobiles are not permitted in the park.

## Trails

The newest addition to Sir Winston Churchill trails, the accessible 1 km Miyo Mahkamikisi trail, that makes a loop around the campsite with multiple access points. The name, pronounced me yo mah ga mix in, means good journey.

The 2.5 kilometre Long Point Trail takes you through the various vegetation types on the island, to the westernmost tip. Along the way, see unparalleled views of Lac La Biche.

Boardwalk Trail is 1.2 kilometres long and goes through the 300 year old-growth boreal forest. Because of its island location, this forest was untouched by forest fires that have naturally occurred elsewhere in the area.

Old Growth Alley, a perimeter trail around the edge of the island, connects Long Point and Boardwalk trails with the extensive network of utility trails and the main trail along the causeway.

This park has 72 private camping sites in lush green foliage; all with power hookups. Facilities include sewage dumping station, boat launch, fire pits, flush toilets, showers, playgrounds, picnic shelter, and a store. A group camping area and cabins are available by reservation only.

## Bear Smart

You are in bear country and so should take necessary precautions such as securing your food and properly disposing of garbage.
