

Wetlands

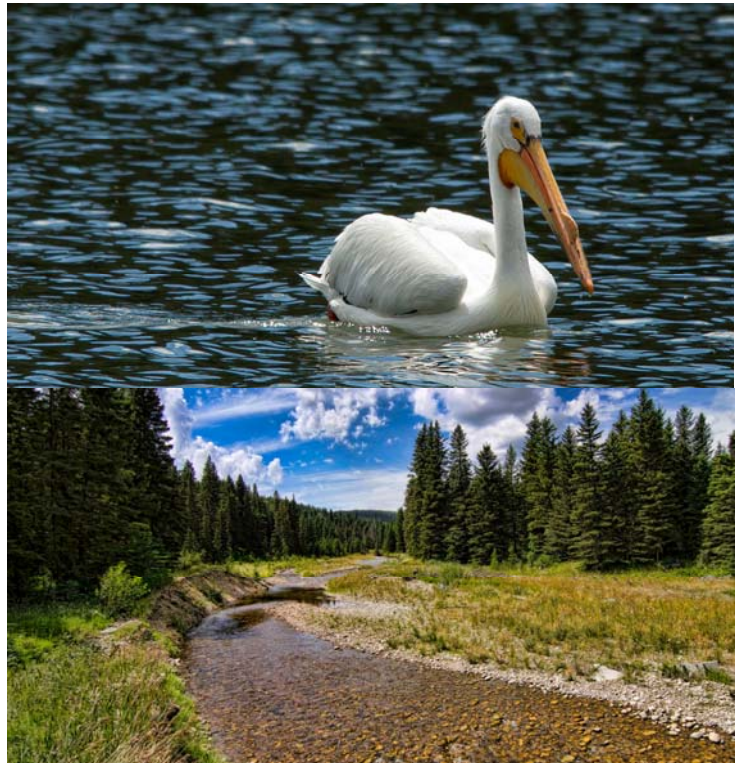

Grade: Five

A full or half day program depending on how many wetlands you would like to visit! Two sites are seen on a full day program where we compare dramatically different water bodies. Catch aquatic critters and study water quality in a pond site and a shallow moving water site. (4 hours full day, 2 hours half day)

Your full day or half day program includes:

- ✓ Catch and identify wetland creatures in two different aquatic environments using dip nets, seine nets and D-nets.
- ✓ Compare and contrast different aquatic environments.
- ✓ Identify living and non-living components in the ecosystem.
- ✓ See different adaptations of creatures that live in a stream and in a small pond.

Science Curriculum Connections: This program meets the general learner expectation 5-10

Location: This program is delivered at various field sites in the Cypress Hills.

Cost: \$5.00 to \$10.00 per student, per program
